

NEW TITLE

International Journal of

AVIATION management

Scope of the Journal

IJAM addresses major management issues facing the air transport industry today. The journal offers practitioners and academics a forum for analysis and discussion in the field of aviation management. Papers cover all the major sectors of the industry: airlines, airports, air traffic control and related organisations.

Contents

Articles report on current findings of research in the field of aviation management. Findings may result from empirical observation. IJAM includes research papers, book reviews, commentary and shorter viewpoint pieces. Special issues devoted to important topics in aviation management will occasionally be published.

Subject coverage:

In the field of aviation management, IJAM aims at providing analysis and findings in the areas of, but not limited to:

- Strategic issues
- Logistics and air cargo
- Operations
- Forecasting methods and revenue management
- Finance and economics
- Intermodal transport topics
- Management
- Environmental issues
- Air transport policy and regulation
- Aviation law
- Macroeconomic issues
- Network planning, slot allocation, scheduling
- Air traffic control
- Airport planning and management
